

Output Management

HOW

much of your output is left uncollected around your MFPs, wasting paper and money and potentially exposing your sensitive corporate information to the wrong people?

CONSIDER...

the average office employee prints 10,000 pages per year.*

*Source: reduce.org, conservatree.org/learn/EnviroIssues/TreeStats.shtml

Just 25% of unclaimed output (wasted pages) could have a significant impact.

WASTE IMPACTS

1

FINANCIAL COST

Assuming 10K pages at 5¢ per print (includes paper, equipment, toner and related software). This equates to \$12,500 in direct printing costs for every 100 employees.

X

=

\$12,500

2

ENVIRONMENTAL CONCERNS

The process to manufacture a ream of office paper requires significant quantities of trees and fresh water.

=

0.6 TREE

=

300 TREES

=

2.6 GALLONS*

=

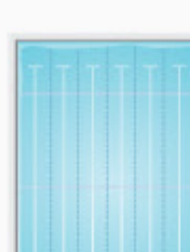

650,000 GALLONS
